EXPERIENCE

Digital design intern | InternetZoo - July - August 2022

I developed front-end, designed social media materials, and created online campaigns using HTML, CSS, Figma, JIRA, and a CMS.

Volunteer graphic designer | Project 2030 - January - May 2020

I was part of a team dedicated to fighting for environmental change. My role was to create social media content using Adobe InDesign, Illustrator, and Slack to engage and educate.

Graphic designer | StraxSkilte - January - September 2020

My first graphic design job in Denmark was at a small family business. There, I gained technical and personal skills, communicated with customers, and created various designs, including menu cards, stickers, business cards, logos, brand identities, and large-format media.

Graphic designer | Museum of Janko Kral - May - August 2018

I took a part-time job in Slovakia to improve my communication skills and learn to work well under pressure. I also worked on graphic design tasks for a cultural institution that aims to make history fun for younger generations. My job was to develop printed materials for exhibitions and promotion.

Professional training | FaxCopy - January - May 2017

For my high school program, I did mandatory professional training. I chose to work at a stationery and printing shop that offers graphic design services. With my supervisor's guidance, I worked on customer orders in a fast-paced environment.

Graphic designer | ReproServis Kovac - July - August 2016

I learned to use Adobe InDesign and Illustrator while working at a printing house, where I collaborated with a senior graphic designer on orders. My responsibilities also included post-production with lasers, printers, and plotters, as well as final revisions with the customer.
